THE DAILY BEE.

Sworn Statement of Circulation. State of Nebraska, County of Douglas, ss. George H. Tschuck, secretary of The Bee Publishing Company...

Sworn to before me and subscribed to in my presence this 30th day of July, A. D. 1890. N. P. FEIL, Notary Public.

IN THE programme for the merchants' carnival the "drummer" boys must not be forgotten.

WELL lighted streets and illuminated buildings should be a feature of Merchants' week.

OMAHA is looking northward with the Canadian Pacific and the Delaware and Lackawanna heading this way.

THE mad dog is still allowed to terrorize women and children while the council wastes time over the selection of a dog catcher.

UNLIKE other cities Omaha has not demanded a bonus from street railway companies for the valuable franchises which they now enjoy.

A DELEGATION of Mississippi editors is now on a trip through Iowa, and the country editors are fearful lest the chivalrous southerners have brought their guns with them.

THE despair and wretchedness of the Illinois coal mining districts can be depicted in no more appalling colors than in the fact that one hundred and fifty women led a mob of striking miners into deeds of violence.

IOWA does not propose to take a back seat for anybody with her magnificent crop showing. Iowa never had finer prospects for a great harvest, and it is not likely that she will let her grip as one of the banner corn states of the union.

WITH the early advent of railroads in the heart of the Wyoming oil fields there is a promise that the petroleum industry will be vigorously pushed forward. The Pennsylvania of the west will then demonstrate the value of its rich mineral resources.

AND now it is contradicted that Kate Maxwell is the "cattle queen," was lynched in company with Postmaster Averill, and furthermore it is vouched for that Kate Maxwell is a myth. This revelation certainly takes the edge off the Wyoming sensation.

CHAIRMAN JONES, of the national greenback party, will have no prohibitionists, female suffragists or other political isms attached to the tail of his kite. Cut short these appendages, it is hard to see how Chairman Jones will be able to fly his bob-tail chestnut over the political race track.

OMAHA takes the place next to New Orleans in the bank clearing record for the week ending July 27. She ranks thirteenth in the list of thirty-seven American and Canadian cities and stands fourth as the most important financial center between the Mississippi river and the Pacific ocean.

THE ocean grey hounds have found a powerful rival in the new Hamburg-American steamer Columbia, which has just beaten the famous records of all the fast steamships. And now there will be a straining and a striving to lower the record still more, even though a boiler bursts and sends one of these monster vessels to the bottom of the sea.

The siting west of Omaha, notably Denver, Salt Lake City and San Francisco, are finding fault because the government has not extended the excursion of the delegates to the three American convention as far as the Pacific coast. The argument advanced is that the representatives from the western coast of South America are quite as anxious to visit San Francisco as they are to see New York, Philadelphia or Boston.

REACTION IN KANSAS.

There are evidences of a widespread reaction in popular sentiment in Kansas regarding prohibition. Within a year there has been a steady growing demand for the reabmission of the prohibitory law, and the agitation has increased in volume and vigor since the defeat of prohibition in Massachusetts and Pennsylvania.

The discussion of the subject has disclosed a condition of affairs in the state very similar in character to that experienced in other states having prohibition laws. This is, that while the law is enforced in the moral districts and the smaller communities, in the cities and larger towns efforts to enforce it have signally failed.

The prohibitionists, not alone of Kansas, but of the entire country, are likely to derive some present comfort from the views of prohibition and license contributed by Senator Ingalls to the August Forum, but it would not be difficult to show that the distinguished senator knows far less about this subject, even with respect to his own state, than he does about some others.

GRAIN RATES AND EXPORTS. The west is deeply interested in the late decision of the inter-state commerce commission on the question of transportation rates to the seaboard and to foreign ports. About a year ago the New York produce exchange complained to the commission that various railroads transporting traffic between Chicago and other western points and New York billed freight from the west to European ports at less proportionate rates than was charged on shipments to New York.

Now we are waiting to hear from Mr. Bea Folsom and Mrs. Grover Cleveland before we can get even the right to purchase the Planters' house square for a postoffice. This is just what was predicted. Had the location been made on upper Farnam or the Lowe-Hoagland block the deed could have been procured in ten days, and the square would not be graded ready for the foundation. The hue and cry which was made by the parties who were in

unjust to home consumers supplied from eastern markets. It would clearly be an imposition to tax the Atlantic coast consumer of wheat in order to give the foreigner cheaper bread. But a very important question is, what effect is this decision likely to have upon our export trade and upon the prosperity of the west, which furnishes by far the larger part of our exports? The character of the answer to this will depend a great deal upon whether the ocean rates shall be maintained or reduced.

OMAHA wants cheaper gas and a better quality of gas. On that score there can be no dispute. But all the talk about anybody supplying electric lights cheaper than gas comes from people who do not know what they are talking about. The thing has been tried in the east, where fuel and labor are much cheaper than in Omaha.

THE United States senate committee on Indian affairs, consisting of Senators Daves, Manderson, Jones, Stockbridge, with their ladies, secretaries and attendants, have just visited Sitka and Juneau, Alaska, in order to investigate the habits, the customs and morals of the aborigines in our far-away northwest possessions.

What Prohibitionists Hate. Prohibitionists hate to have cold water thrown on their efforts for the suppression of the liquor traffic.

A Gun Chewer Himself. The report going about among our contemporaries that the mayor of Cincinnati is about to issue an order forbidding the chewing of cigars in the city is not true. Mayor Mosby is a gun chewer himself.

Isaacs Squarely Joined. The saloonkeepers of Cincinnati are in open rebellion and declare their purpose of overhauling the laws of the state in spite of the state. This makes a square issue on the question of who is running this country.

A Postage of Cleveland. Referring to the acquisition of Hoodie Alderman McQuade, the New York Herald remarks that nothing under heaven helps a prisoner so much as a strong lawyer, his case and a wishy-washy, flax-doodle district attorney as prosecuting officer.

But It Won't. A consumer's trust. A trust for the laboring man. A trust for the hard working woman. A trust for those who do not show on the tax duplicate, but who, none the less, pay all the taxes.

the pool with the Polson heirs about the damaging delay and the stoppage of great blocks of buildings projected and ready to be begun, is now proven to have been the clatter of demagogues and ardent humbugs. But the whirligig of time has at last opened the eyes of the people of Omaha to the fact that they have been imposed on and the party who were yelling "traitor" and "stop thief" at the top of their voices.

It will be minor for general regret if the effort to induce Judge Cooley, chairman of the inter-state commerce commission, to become chairman of the Trunk-line association shall succeed. The position pays twenty-five thousand dollars a year, while that held by the judge pays only seventy-five hundred, and is doubtless more arduous, so that the inducement is a tempting one.

PROBIA has just dispatched a train load of thirteen cars of starch bound for San Francisco. This is the first shipment of the kind made from that city to the Pacific coast, and illustrates what a great field for investment the starch industry offers to capital.

SAN FRANCISCO looks with alarm upon the growth of Victoria, British Columbia, and fears that this city, backed by English capital, is likely to cut into her trade. There is little to fear, however, that the supremacy of the Pacific will be wrested from San Francisco without a struggle.

WHY can't the county commissioners join with the city in opening Eighth street between the court house and Dodge street? Hasn't the blockade lasted long enough? The county has expended thousands of dollars in grading Leavenworth and other streets, why not improve the approaches of the court house, which should be made accessible from every direction.

ARTICLES of incorporation of the Omaha, Lincoln & Gulf railroad have been filed to build a road one thousand miles long from Omaha through Nebraska, Kansas, Indian Territory and Texas to a point on the Gulf of Mexico. It is quite evident that the day for ambitious projects is not yet over.

A Gum Chewer Himself. The report going about among our contemporaries that the mayor of Cincinnati is about to issue an order forbidding the chewing of cigars in the city is not true.

Isaacs Squarely Joined. The saloonkeepers of Cincinnati are in open rebellion and declare their purpose of overhauling the laws of the state in spite of the state.

A Postage of Cleveland. Referring to the acquisition of Hoodie Alderman McQuade, the New York Herald remarks that nothing under heaven helps a prisoner so much as a strong lawyer.

But It Won't. A consumer's trust. A trust for the laboring man. A trust for the hard working woman. A trust for those who do not show on the tax duplicate, but who, none the less, pay all the taxes.

The Troublesome Problem of the Time. The tendency is to reduce society to two classes—the employer class, consisting of a few enormously rich men, and the employed class, including all the rest of the people.

THE BEER KEGS OF KANSAS.

Ex-Governor Robinson's Views on the Prohibitory Law. More Liquor Sold Than Ever and No Revenue Obtained—Thousands of Dollars Assessed as Fines But Never Paid.

Prohibition in Kansas. Ex-Governor Charles Robinson, of Lawrence, being asked his opinion of prohibition in Kansas and the agitation for reabmission of that question to the voters, said to a correspondent of the Kansas City Times: "My opinion of general prohibition is the same as it has been for forty years."

When the liquor is obtained it can be taken to the various saloons, either in casks or in kegs, and used in connection with soda pop or other temperance drinks. Now the Chicago Tribune is an authority for saying there are 3,600, and these do not include cider joints, as they get no permits, although they are so-called prohibition.
